# 1 The Master's Degree Biochemistry

## 1.1 Content, Aims of Studies and Requirements

The Master of Science program in Biochemistry is research-oriented and taught in English. The successful completion of the two-year program will lead to a Master of Science (M.Sc.) degree. With the program, students will acquire a strong background in basic biochemistry and in modern life science research practice. This will enable them to take up career paths in both university and company environments. The modules are spread over the main life science areas, including biochemical, biomolecular, and medical research. Students can both extend and specialize their scientific knowledge.

Requirements to participate in the Master's Degree Course Biochemistry are specified in the appendix of the examination regulations.

## 1.2 Structure and Progression of the Studies

In the first year of the program, students attend an **Advanced Biochemistry and Molecular Medicine Lecture Series** and a **Hot Topics in Biochemistry and Medicine Method Seminar** (both Core Modules/Basismodule) as well as two **Subject Modules** (both Advanced Modules/Aufbaumodule). The latter are 8-week laboratory modules, covering different areas in the life sciences (see Table 3). The second and third term are dedicated to research and comprise two Laboratory Project Modules, Scientific Writing, and the Project Proposal. In the **Laboratory Project Modules** (Specialization Module/Schwerpunktmodul), students work in a research group of their own choice on a scientific question for 12 weeks, to develop a deeper understanding of experimental methods and techniques. The **Scientific Writing** module (Advanced Modules/Aufbaumodul) fosters transferable general writing skills and specific ones for scientific publishing. This prepares students for the **Project Proposal** (Specialization Module/Schwerpunktmodul), where they learn to write an application for funding related to the topic of their future master thesis. The program is completed with a six-month research project that will be written up in a Master's thesis and presented in a colloquium ("**Master Thesis & Defense Module**", (Specialization Module/Schwerpunktmodul)).

## 1.3 General CP-Survey

<b>Professional Studies</b>		<b>84 CP (70%)</b>
<b>Master Thesis</b>		<b>36 CP (30%)</b>
<b>Total</b>		<b>120 CP</b>

### 1.4 Term Based Schedule

Term#	Core Modules	Advanced Modules	Specialization Modules	Total CP
1	<b>Advanced Biochemistry and Molecular Medicine</b> (whole term, 6 CP)	<b>Subject Module 1*</b> , ** (12 CP) <b>Subject Module 2*</b> , ** (12 CP)		30
2	<b>Hot Topics in Biochemistry and Medicine</b> (workshop, 6 CP)	<b>Scientific Writing</b> (workshop, 6 CP)	<b>Laboratory Project Module 1***</b> (18 CP)	30
3			<b>Laboratory Project Module 2***</b> (18 CP) <b>Project Proposal****</b> (6 CP)	24
4			<b>Master Thesis &amp; Defense</b> (36 CP)	36

\* One **Subject Module** has to be completed before the first Laboratory Project Module can be performed

\*\* One **Subject Module** has to have a biochemical focus (**MN-BC-BSM**) the other can have a more general focus (**MN-BC-GSM**)

\*\*\***Laboratory Project Modules** have to be performed in different research groups.

\*\*\*\* The supervisor of the **Project Proposal** has to be the supervisor of the master thesis.

# As students are admitted in fall and spring, the order in term 1 and 2 can vary.

### 1.5 Calculation of the Overall Grade

10%	Advanced Biochemistry and Molecular Medicine
5%	Hot Topics in Biochemistry and Medicine
5%	Scientific Writing
10%	Subject Module 1
10%	Subject Module 2
10%	Laboratory Project Module 1
10%	Laboratory Project Module 2
5%	Project Proposal
35%	Master Thesis & Defense
<b>100%</b>	<b>Total</b>

## 2 Module Descriptions

The study program contains **nine modules**.

The study program is initiated with two core modules that define the common knowledge base of Biochemistry students. In the **Advanced Biochemistry and Molecular Medicine** lecture series, researchers from both biochemistry and molecular medicine present core knowledge combined with cutting edge research. The **Hot Topics in Biochemistry and Medicine** reviews core life science methods and techniques and their application in modern research.

Students have to successfully complete two **Subject Modules**, preferably in the 1st and 2nd term (Table 2). The Subject Modules aim to extend the knowledge in the respective research area with 8-week laboratory and theoretical training. Simultaneously, the students extend their skills of presenting scientific results in oral and written form. To better achieve these competencies, the subject modules contain two to three examination elements. The **Scientific Writing** module aims to bolster a necessary transfer skill. It is well placed to support the writing necessary in subsequent modules.

The **Laboratory Projects** in the 2nd and 3rd term of the Master's degree course will help students learn how to actively integrate into a research group and extend their practical skills by means of a laboratory project of 12 weeks. A student may not perform both Project Modules in the same research group to ensure the broadest possible education. In the module **Project Proposal** students will write an application for funding closely related to the topic of their future master thesis. This is both a good test run for later applications and helps with the preparation of the module Master Thesis & Defense.

The Master Thesis is an integrative part of the module **Master Thesis & Defense**. Further information and regulations can be found in the module description as well as in the examination regulations of the Master's degree course.

The following tables give an overview of available modules. Detailed descriptions are listed afterwards.

### 2.1 Overview of module types

The programme consists of nine modules with 12-14 examination elements (+ 2 examination elements for the Master thesis & Defence). For each module all exam elements have to be passed to pass the overall module.

Name	Duration	Examination type* Module type**	Credits
Advanced Biochemistry and Molecular Medicine, MN-BC-BCMM	winter term	1 exam element, P	6
Hot Topics in Biochemistry and Medicine, MN-BC-HT	summer term	1 exam element, P	6
Subject Module 1 & 2 MN-BC-BSM or MN-BC-GSM	8 weeks	2 or 3 exam elements, WP	24 (12+12)
Scientific Writing MN-BC-SW	workshop	1 exam element, P	6
Laboratory Project Module 1 & 2 MN-BC-PM	3 months	2 exam elements, P	36 (18+18)
Project proposal MN-BC-PP	5 weeks	1 exam element, P	6
Master Thesis & Defense MN-BC-MT	6 months	2 exam elements, P	36

\* The proportional weighting of the individual examination elements for the total module grade is outlined in the module descriptions (No. 6).

\*\* Module type is either P, obligatory (Pflicht) or WP, facultative obligatory (Wahlpflicht)

## 2.2 Available Module Places

Subject Module Name (ID)	Lecturer	Available Places (subject to change)			
		Winter		Summer	
		1 <sup>st</sup>	2 <sup>nd</sup>	1 <sup>st</sup>	2 <sup>nd</sup>
Medical Biochemistry – Enzymes, Metabolites and Diseases, MN-BC-BSM01	Schwarz (BC)	10			
Molecular concepts of human diseases, MN-BC-BSM02	Brachvogel (Med)	8			
Epigenetics, MN-BC-BSM03	Schwaiger (Med)	8			
Metabolic Reprogramming in Health and Disease, MN-BC-BSM04	Trifunovic (Med)		10		
Introduction to protein crystallography, MN-BC-BSM05	Baumann (BC)		8		
Analysis of protein structures and protein-ligand interactions, MN-BC-BSM06	Baumann (BC)			8	
3D Cryo Electron Microscopy, MN-BC-BSM07	Behrmann (BC)			9	
Neurobiochemistry, MN-BC-BSM08	Schwarz (BC)			8	
Mitochondria and Neurodegeneration, MN-BC-BSM09	Rugarli (BC)			1	
Posttranslational Regulation of Proteins, MN-BC-BSM10	Hofmann (Bio)			2	
Molecular Genetics, MN-BC-BSM11	Gehring (Bio)			2	
Advanced Light Microscopy, MN-BC-GSM01	Schauss (Bio)			1	
Molecular Mechanisms of Human Disease, MN-BC-GSM02	Schumacher (Med)			2	
Mitochondrial Proteins – Biogenesis, Networks and Functional Decline, MN-BC-BSM12	Riemer (BC)				8
Peptide Biochemistry, MN-BC-BSM13	Neundorf (BC)				4
Functional Genomics, MN-BC-GSM03	Graef (MPI)				2
Cell Death in Inflammation, Immunity and Disease, MN-BC-GSM04	Corona (Bio)				2
Molecular Human Genetics, MN-BC-GSM05	Wirth (Med)				4
Advanced Bioinformatics, MN-BC-GSM06	Beyer (Bio)				1

Bio - Faculty of Mathematics and Natural Sciences: Dep. of Biology

Med - Medical Faculty: Institute for Biochemistry

## 2.3 Core Modules, Basismodule

### Advanced Biochemistry and Molecular Medicine

ID	Workload	Credit Points	Term	Offered Every	Duration
MN-BC-BCMM	180 h	6 CP	1 <sup>st</sup> or 2 <sup>nd</sup>	winter term	15 weeks
1	<b>Type of lessons</b> Lectures	<b>Contact Times</b> 49 h	<b>Self-Study Times</b> 131 h	<b>Group Size*</b> approx. 50-70	
2	<b>Module Objectives and Skills to be Acquired</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have acquired an understanding of advanced concepts and technologies related to the molecular basis of biochemical principles.</li> <li>• possess the ability to develop hypotheses through problem analysis and will be able to develop experiments to test these hypotheses.</li> <li>• have acquired a knowledge of important concepts in biochemistry such as reaction mechanisms, molecular basis of diseases, development and use of model systems and key technologies</li> </ul>				
3	<b>Selected content of the module</b> <ul style="list-style-type: none"> <li>• Regulation of protein translation, maturation, and degradation in health and disease</li> <li>• Structural dynamics of soluble and membrane-bound proteins</li> <li>• Structure and function of proteins of the immune system and receptor-like kinases</li> <li>• Synthesis, modifications and therapeutic applications of synthetic peptides</li> <li>• Mitochondrial biogenesis, proteostasis and cellular redox signaling</li> <li>• Structure and function of metalloenzymes-enzymes in inborn errors of metabolism</li> <li>• Structural basis of eukaryotic protein kinase regulation and function</li> <li>• Cellular mechanobiology, novel tools in optogenetics and high-density cell tracking</li> <li>• Tumour necrosis factor-based signalling in health and disease</li> <li>• Molecular mechanisms of membrane protein trafficking in eukaryotic cells</li> <li>• Autophagy and proteostasis in neurodegenerative disorders</li> <li>• Complex I and mitochondrial disorders</li> <li>• Proteases controlling mitochondrial fission and fusion in aging and disease</li> <li>• Mapping phosphorylation-based signaling in eukaryotic cells</li> <li>• Molecular architecture of histone-based control of gene expression</li> <li>• Extracellular matrix-based signaling in proliferation, differentiation, and apoptosis</li> <li>• MicroRNAs, extracellular matrix and mitochondria in paediatric disorders</li> <li>• Chemical biology of nucleotide-based diagnosis and treatment of disease</li> <li>• Peptido-mimetics control and dissect cellular signaling mechanisms in cancer</li> <li>• Mechanism and treatment of spinal muscular atrophy and related disorders</li> </ul>				
4	<b>Teaching Methods</b> Research-oriented, interactive lectures (incl. e.g. audience response systems and concept mapping)				
5	<b>Prerequisites</b> Enrolment in the Master's degree course "Biochemistry and Molecular Medicine" or in the Master's degree course "Biological Sciences" <b>Additional academic requirements</b> The knowledge of basic and specific biochemistry, cell biology and genetics on the level of general biochemistry/biology text books (e.g. Voet-Voet/Stryer/Lehninger, Alberts and Lewin) is required. Lecturers will hand out review articles on the topic that should be read before the lecture.				
6	<b>Type of Examination</b> Two hours written examination about topics of the lectures (100 % of the total module mark)				

<b>7</b>	<b>Credits Awarded</b> Written examination at least "sufficient"
<b>8</b>	<b>Compatibility with other Curricula*</b> Master's degree course "Biological Sciences"
<b>9</b>	<b>Proportion of Final Grade</b> 10%
<b>10</b>	<b>Module Coordinator</b> Dr. Jakob Suckale, phone 470-3536, e-mail: <a href="mailto:jsuckale@uni-koeln.de">jsuckale@uni-koeln.de</a>
<b>11</b>	<p><b>Further Information</b></p> <p><b>Participating faculty:</b> Prof. Dr. U. Baumann, Prof. Dr. E. Behrmann, Prof. Dr. T. Benzing, Prof. Dr. U. Brandt, Prof. Dr. B. <b>2</b>	<b>Module Objectives and Skills to be Acquired</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have obtained a general understanding of the biology of peptides, synthetic methodologies to generate peptides, application of peptides and peptide conjugates in medicinal or analytical context</li> <li>• have acquired working skills to tackle the synthesis of peptides and peptide libraries, to apply deconvolution techniques, and to investigate peptide structure by biophysical methods.</li> <li>• can independently carry out small scientific projects related to the topic of the module.</li> <li>• have learned how to present research results in oral and written form and to critically discuss scientific publications related to the topic of the module on a professional level.</li> <li>• are able to transfer the skills acquired in this module to other fields of biochemistry</li> </ul>				
<b>3</b>	<b>Module Content</b> <ul style="list-style-type: none"> <li>• Synthesis of peptides and proteins (i.e. solid phase peptide synthesis, native chemical ligation, Staudinger ligation, etc.)</li> <li>• Peptide modifications (i.e. mimetics, labelling strategies, cyclic peptides)</li> <li>• Peptide libraries, deconvolution</li> <li>• Analytical methods (mass spectrometry, Edman degradation, fluorescence techniques, CD spectroscopy)</li> <li>• Antimicrobial peptides, peptide hormones, cell-penetrating peptides, peptide targeting sequences</li> <li>• Peptides in diagnostics and therapy</li> </ul>				
<b>4</b>	<b>Teaching Methods</b> Lectures; Practical/Lab (Project work); Seminar; Computer exercises; Guidance to independent research; Training on presentation techniques in oral and written form				
<b>5</b>	<b>Prerequisites</b> Enrollment in the Master’s degree course “Biochemistry and Molecular Medicine”, in the Master’s degree course “Biological Sciences” or in the Master’s degree course “Chemistry”				
<b>6</b>	<b>Type of Examination</b> The final examination consists of two parts: Two hours written examination about topics of the lectures and the practical/lab part (70% of the total module mark), and an oral presentation (30% of the total module mark)				
<b>7</b>	<b>Credits Awarded</b> Regular and active participation; Each examination part at least “sufficient” (see appendix of the examination regulations for details)				

8	<p><b>Compatibility with other Curricula</b>                  Subject module in the Master's degree course "Biological Sciences",                  combined advanced and experimental module in the Master's degree course "Chemistry"</p>
9	<p><b>Proportion of Final Grade</b>                  10%</p>
10	<p><b>Module Coordinator</b>                  Prof. Dr. Ines Neundorf, phone 470-8847, e-mail: <a href="mailto:ines.neundorf@uni-koeln.de">ines.neundorf@uni-koeln.de</a></p>
11	<p><b>Further Information</b>                  Literature:</p> <ul style="list-style-type: none"> <li>• Sewald, N., Jakubke, H.-D. (2009) Peptides: Chemistry and Biology. 2nd edition, Wiley-VCH</li> <li>• Further original publications will be handed out at the introduction to the module</li> </ul> <p>General time schedule: Week 1-5 (Mon.-Fri.): Lectures, practical/lab, preparation for the seminar talk (topic and date will be arranged individually); Week 6 (Mon.-Fri.): Preparation for poster presentation; Week 7 (Mon.-Fri.): Preparation for the written examination</p> <p>Note: The module contains hand-on laboratory work conducted by small groups of students and individually and is taught in course rooms and research laboratories. The module does not contain computer-based practicals/ research as a main component.</p>

\* 2 students from the Master's degree course "Biological Sciences", 4 students from Master's degree course "Biochemistry and Molecular Medicine", and 6 from the Master's degree course "Chemistry".

**Functional Genomics (Graef)**

ID	Workload	Credit Points	Term	Offered Every	Duration

(2009) The Elements of Statistical Learning. 2<sup>nd</sup> edition, Springer</li> <li>• Additional reviews and original papers will be handed out during the module</li> </ul> <p><b>General time schedule:</b> Week 1-5 (Mon.-Fri.): Lectures, practical/lab, preparation for the seminar talk (topic and date will be arranged individually); Week 6 (Mon.-Fri.): Writing seminar paper; Week 7 (Mon.-Fri.): Preparation for the written examination</p>

\* 1 student from the Master's degree course "Biochemistry and Molecular Medicine" and 7 students from the Master's degree course "Biological Sciences".

## 2.5 Specialization Modules, Schwerpunktmodule

### Laboratory Project Modules

ID	Workload	Credit Points	Term	Offered Every	Duration
MN-BC-LM1/2	540h	18 CP	2 <sup>nd</sup> -3 <sup>rd</sup> term	all year round	12 weeks
1	<b>Course Types</b> Interactive Tutorials, Project work and Seminar	<b>Contact Time</b> 360 h	<b>Self-Study Times</b> 180 h	<b>Group Size</b> 1	
2	<b>Module Objectives and Skills to be Acquired</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have learned to do scientific work in a specific field of a given research group.</li> <li>• have understood how to plan and conduct a small scientific project.</li> <li>• have gained experience in following the presentation of scientific material by others in the frame of the seminar program of a research group.</li> <li>• have learned how to present research results in oral and written form and to critically discuss scientific publications.</li> </ul>				
3	<b>Module Content</b> The detailed content of the Laboratory Module is proposed by the supervising tutor on an individual basis in agreement with the student. The content requires approval by the M.Sc. Biochemistry and Molecular Medicine Degree Committee. A Laboratory Module may be supervised by any member of staff qualified under the University Regulation § 65 HG.				
4	<b>Teaching Methods</b> Interactive tutorials; Practical/Lab (Project work); Seminar; Guidance to independent research; Training on presentation techniques in oral and written form				
5	<b>Prerequisites</b> Enrollment in the Master or Biochemistry and Molecular Medicine Successful completion of at least one Biochemical Subject Module				
6	<b>Type of Examination</b> The final examination consists of two parts: 20 min oral presentation followed by a 10-30 min discussion of the presented work and the scientific background (30 % of the total module mark) and seminar paper (70 % of total module mark).				
7	<b>Credits Awarded</b> 18 CP				
8	<b>Compatibility with other Curricula</b> Specific				
9	<b>Proportion of Final Grade</b> 10%				

MODULE COMPENDIUM – BIOCHEMISTRY - MSc

10	<b>Module Coordinator</b> Head of the M.Sc. Biochemistry and Molecular Medicine Degree Committee
11	<b>Further Information</b> Note: A student may not perform both laboratory modules in the same research group. Before taking the first Laboratory Project Module, one Subject Module has to be completed.

**Project Proposal**

ID	Workload	Credit Points	Term	Offered Every	Duration
MN-BC-PP	180 h	6 CP	3 <sup>rd</sup> term	all year round	5 weeks
<b>1</b>	<b>Type of lessons</b> Interactive Tutorials, Project work, Scientific talks	<b>Contact times</b> approx. 30 h	<b>Self-Study Times</b> approx. 150 h	<b>Group Size</b> max. 1	
<b>2</b>	<b>Module Objectives and Skills to be Acquired</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have learned to search the literature, to identify papers with important impact in the field and to extract relevant information in respect to their own research topic</li> <li>• are able to develop a working hypothesis, theory or model that explains a biochemical mechanism and/or biochemical problem which has been studied in a research project</li> <li>• are able to propose reasonable experiments and define expected positive and negative outcomes including control experiments</li> <li>• are able to develop a work plan using different and complementary experimental approaches to prove or disprove their hypothesis</li> <li>• have learned to describe and to critically discuss a state-of-the-art method</li> </ul>				
<b>3</b>	<b>Module Content</b> The Project Proposal Module may be supervised by any member of staff qualified under the University Regulation § 65 HG. The subject of the Project Proposal is developed with the supervising tutor on an individual basis in agreement with the student. It may cover the following areas: <ul style="list-style-type: none"> <li>• Listen to 10 scientific presentations (documentation required)</li> <li>• Review of the results of the passed laboratory module (MN-BC-LM1/2) and definition of the strength and weaknesses of the available results and data</li> <li>• Description of the state-of -the-art research in a specific field by searching the literature and extracting the most important and influential work in the field (include citations)</li> <li>• Definition of new research aims and hypothesis for the Master thesis module</li> <li>• Identification of key methods and technologies that can be applied, including a critical discussion of 1-2 key methods with advantages and disadvantages in a separate essay</li> <li>• Development of a work plan including in detail description and justification of experimental approaches</li> <li>• Suggestion of alternative approaches, identification of pit falls and definition of crucial control experiments</li> <li>• Timed work schedule</li> </ul>				
<b>4</b>	<b>Teaching Methods</b> Interactive tutorials; Guidance to independent research project planning and proposal writing; Training on presentation techniques in written form; literature search; Essay writing				
<b>5</b>	<b>Prerequisites</b> Enrollment in the Master's degree course "Biochemistry and Molecular Medicine"; Successful completion of 2 laboratory project and 2 subject modules				

<p><b>6</b></p>	<p><b>Type of Examination</b> The final examination consists of a written project proposal.</p>
<p><b>7</b></p>	<p><b>Credits Awarded</b> Documented participation in 10 scientific presentations throughout the Master studies Total module mark at least “sufficient” (see appendix of the examination regulations for details).</p>
<p><b>8</b></p>	<p><b>Compatibility with other Curricula</b> None</p>
<p><b>9</b></p>	<p><b>Proportion of Final Grade</b> 5 %</p>
<p><b>10</b></p>	<p><b>Module Coordinator</b> Head of the M.Sc. Biochemistry and Molecular Medicine Degree Committee</p>
<p><b>11</b></p>	<p><b>Further Information</b> Compulsory Specialization Module of the Master’s degree course “Biochemistry and Molecular Medicine”. Literature: Will be handed out at the beginning and during the module General time schedule: Throughout the master studies listening to at least 10 scientific presentations, Week 1-3 (Mon.-Fri.): Interactive tutorials, literature search, preparation of the seminar paper; Week 4-5 (Mon.-Fr.): writing seminar paper Introduction to the module/Examination dates: will be arranged in agreement between the student and the supervising tutor.</p>

**Master thesis and Defence**

ID	Workload	Credit Points	Term	Offered Every	Duration
MN-BC-MT	1080 h	36 CP	4 <sup>th</sup> term	all year round	6 month*
1	<b>Type of lessons</b> a) Master Thesis b) Defense	<b>Contact times</b> According to the individual demand of the student	<b>Self-Study Times</b> According to the individual need of the student	<b>Group Size</b> max. 1	
2	<b>Module Objectives and Skills to be Acquired</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have learned to perform scientific work independently and at a demanding level.</li> <li>• have gained substantial further training in presenting their results to scientific audiences in written and oral form.</li> <li>• are able to defend their scientific achievements and to develop their own ideas within their research fields.</li> </ul>				
3	<b>Module Content</b> <ul style="list-style-type: none"> <li>• The detailed content of the Master Thesis (30 CP) is proposed by the supervising tutor on an individual basis in agreement with the student and has to be approved by the M.Sc. Biochemistry Degree Committee. The Master Thesis may be supervised by any member of staff qualified under the University Regulation § 65 HG.</li> <li>• The Defense (6 CP) consists of a 20 min talk on the results of the thesis and is followed by a 25-40 min discussion on the thesis as well as its scientific background.</li> </ul>				
4	<b>Teaching Methods</b> Practical/Lab (Project work); Seminar; Guidance to independent research; Training on presentation techniques in oral and written form				
5	<b>Prerequisites</b> Successful completion of all other modules of the Master's degree course "Biochemistry and Molecular Medicine". <b>Thesis:</b> Formal written permission by the M.Sc. Biochemistry and Molecular Medicine Degree Committee before starting the module (application form can be obtained from <a href="http://www.biochemie.uni-koeln.de/">http://www.biochemie.uni-koeln.de/</a> ). <b>Defense:</b> Successful completion of the Master Thesis with a grade of at least "sufficient".				
6	<b>Type of Examination</b> The final examination consists of two parts: Master Thesis (75 % of the total module mark), Defense of the Master Thesis (25% of the total module mark). The written thesis will be graded by two examiners and their grades combined 1:1.				
7	<b>Credits Awarded</b> Each examination part at least "sufficient" (see appendix of the examination regulations for details)				
8	<b>Compatibility with other Curricula</b> Specific to the Master of Biochemistry and Molecular Medicine				

9	<p><b>Proportion of Final Grade</b></p> <p>35%</p>
10	<p><b>Module Coordinator</b></p> <p>Head of the M.Sc. Biochemistry and Molecular Medicine Degree Committee</p>
11	<p><b>Further Information</b></p> <p>Final Specialization Module of the Master’s degree course “Biochemistry and Molecular Medicine”.</p> <ul style="list-style-type: none"> <li>• In case a student cannot find a supervisor for this module, it is the responsibility of the M.Sc. Biochemistry and Molecular Medicine Degree Committee to arrange for one.</li> <li>• The topic of a Master Thesis may be changed once and within the first four weeks.</li> <li>• In special circumstances the M.Sc. Biochemistry and Molecular Medicine Degree Committee may prolong the duration of a Master Thesis by four weeks.</li> </ul>

### 3 Study help

#### 3.1 Sample Study Plans

Start of studies in the **winter term**

Term	Module	Number of Exam Elements Type of Exam	CP
<b>1</b>	Advanced Biochemistry and Molecular Medicine	1, written exam	6
	Subject Module 1	2-3, seminar presentation, (protocol,) written or oral exam	12
	Subject Module 2	2-3, seminar presentation, (protocol,) written or oral exam	12
<b>2</b>	Hot Topics in Biochemistry and Medicine	1, written home work	6
	Scientific Writing	1, written home work	6
	Laboratory Project 1	2, protocol and seminar presentation	18
<b>3</b>	Laboratory Project 2	2, protocol and seminar presentation	18
	Project Proposal	1, written home work	6
<b>4</b>	Master Thesis & Defense	2, master thesis and kolloquium	36
		<b>Total number of elements: 12-14 (excluding master thesis and kolloquium)</b>	<b>Total number = 120</b>

Start of studies in the **summer term**

Term	Module	Number of Exam Elements Type of Exam	CP
<b>1</b>	Hot Topics in Biochemistry and Medicine)	1, written home work	6
	Subject Module 1	2-3, seminar presentation, (protocol,) written or oral exam	12
	Subject Module 2	2-3, seminar presentation, (protocol,) written or oral exam	12
<b>2</b>	Advanced Biochemistry and Molecular Medicine	1, written exam	6
	Scientific Writing	1, written home work	6
	Laboratory Project 1	2, protocol and seminar presentation	18
<b>3</b>	Laboratory Project 2	2, protocol and seminar presentation	18
	Project Proposal	1, written home work	6
<b>4</b>	Master Thesis & Defense	2, master thesis and kolloquium	36
		<b>Total number of elements: 12-14 (excluding master thesis and kolloquium)</b>	<b>Total number = 120</b>

### 3.2 Exam Advice

The chairperson of the examination board, his or her deputy, the head of the respective examination office and his or her deputy can provide legally binding information on examination requirements and performance. The academic advising is carried out by the academic advisors of the Department of Chemistry and by the university lecturers as well as the academic staff who are involved in the training in this study program during office hours. The office hours are posted in the institutes and on the Internet. It is recommended that you make use of an individual course counseling service.

### 3.3 Further Counselling Offers

The Central Student Advisory Service of the University of Cologne (Zentrale Studienberatung der Universität zu Köln) is available for general study advice, in particular about study options and study requirements. Faculty-wide advisory services are available for interdisciplinary study advice. The General Student Committee (Allgemeine Studierendenausschuss, AStA) and the Chemistry Department and the Biology Department offer advice on general issues relating to study organization. The International Office of the University of Cologne (Akademisches Auslandsamt der Universität zu Köln) and the Center for International Relations (Zentrum für internationale Beziehungen, ZIB) of the Faculty of Mathematics and Natural Sciences offer advice for special questions from foreign students and for preparing for a study abroad. In the case of study-related personal difficulties, the psycho-social counseling of the Kölner Studentenwerk can be used. Students with special study requirements can take advice from the university administration (Department 23: Special Study Matters) and the Rector's representative for the needs of students with disabilities and chronic illnesses.
